

CARING FOR PLANET EARTH

"Caring for Planet Earth" is a school enrichment program designed for students enrichment program three through six. Each of the six lessons contains background information, vocabulary and student activities. It introduces environmental issues, while reinforcing math, science, language arts and creative thinking skills and supports the Oklahoma Learner Outcomes.

PACKET HIGHLIGHTS

- **How Big is Your Trash?** The ever-increasing solid waste problem.
- **Bouncing Balls in Bubble Packs** The proliferation of packaging and it's effect on the sold waste problem.
- **Don't Waste the Energy** How recycling saves energy and conserves landfill space.
- **Drinking Dinosaur Water** The hydrologic cycle and groundwater pollution prevention.
- **What Makes Our Forests Grow?** The relationship of rainfall to Oklahoma forests.
- **Breathing Prehistoric Air** Global warming and the greenhouse effect.
- **The Pyramid in Grandpa's Pond** Aquatic food chain.
