

## ENVIRONMENTAL AWARENESS PROGRAM

This program is designed to increase student's understanding of the environment, what makes it up and how things we do affect it. Experimenting and learning about our environment can be interesting and educational as well as being a way to prepare for the future. The lesson materials can be adapted to any age group, kindergarten through 9th grade. It also has ideas to incorporate the studies into different phases of class work, such as math, music, art, spelling, etc. Specific concepts covered include air pollution, energy sources, water pollution, soil conservation, rocks and minerals, plant and animal habitats, and insects.

The following materials are available for this Environmental Awareness Program. The program can be started anytime.

1. **TEACHER'S GUIDE** - General information, lesson plans and experiments that can be done with simple household items.
2. **DATES** - This program will be sent to the participating school on two weeks written notice to the Extension Center. For information on ordering, refer to Page 3.
