The Area Extension Water Specialists is responsible to the Northeast and Southeast District.

Northeast District is comprised of 21 counties. Southeast District has 19 counties. Area Extension Water Specialists develop implement and evaluate water programs of importance to Eastern Oklahoma.

Oklahoma is part of the southern region water quality region. The thirteen states in the southern region meet annually to collaborate, partner in funding resources, review emerging issues and share water resources.

Oklahoma is also part of the United States Environmental Protection (US EPA) agency region 6. Oklahoma has access to current education tools, Federal laws and rules affecting water resources, funding opportunities, and a powerful networking system.
