Oklahoma Cooperative Extension Service
MULTIMIN 90
Successful and long-lasting cattle operations in Central Oklahoma are those that maintain efficiency during periods of volatile input costs and extreme weather conditions while implementing risk management to ensure profitability.

This year’s Central Oklahoma Cattle Conference will focus on beef processing, marketing strategies, mineral nutrition, breeding and genetic options, pasture management, and beef forages versus supplementation. A trade show with up-to-date products from major agricultural suppliers will be another attraction at the conference.

The Oklahoma State University Cooperative Extension Service invites you to register now to reserve your place at this important educational event.
